

✓ Drawing & Plan Association Requirements (Send to Developer)

1. Drawing Upload System

- There will be **Main Drawings**.
 - Each **Main Drawing** can have **multiple associated (child) drawings**.
 - When uploading drawings:
 - Tag one as a “Main Drawing”.
 - Upload and associate multiple drawings under each main drawing.
-

2. Plan and Drawing Association

- When creating a **Plan** inside a **Project**:
 - User can **associate multiple Main Drawings** to the plan.
 - When a **Main Drawing** is associated to a Plan, then:
 - **All its associated (child) drawings must also automatically link to that Plan.**
-

3. Drawing Selection Interface (Marking Entries)

- Wherever users are required to **mark drawings for submission** (e.g., in control plan or reports):
 - Only **Main Drawings** should be displayed for selection.
 - User can **select/mark only Main Drawings**.
 - User should be able to **view the associated (child) drawings** of each main drawing for reference (read-only, not selectable).
-

4. Drawing Entry Submission

- When submitting any entry (e.g., control plan, static report, etc.):
 - For each selected **Main Drawing**, user should be able to:
 - Upload **pictures**.
 - Assign **numbering to each picture** (e.g., Picture #1, #2, etc.).
-

5. Modules Where This Drawing Submission Happens

The following modules require drawing-based submissions:

-  Control Plan
-  Static Report Registration
-  Safety Mention
-  Addressed Note
-  Technity Request
