## Section 6 – Company Organisation

# Assurement

The image shows two screenshots of the Assurement mobile application. The left screenshot, titled 'Company Registration — 7', displays the 'ADD SUBCONTRACTOR' form. It includes fields for Name, Address, Post Code, City, Name of Contact, Phone, Email Address, Type of Subcontractor (dropdown), Start Date (calendar), and an 'Upload Logo' section with a file input field. The right screenshot, titled 'Company Registration — 8', shows the 'COMPANY REGISTRATION' screen with a 'CUSTOMER' section and a 'Type of Subcontractor' dropdown menu. The dropdown menu lists: Mechanical Lifting, Use of explosive tools (selected with a radio button), Chemical Handling, Demolition Works, Radiation work, Excavation Works, and Hot Work.

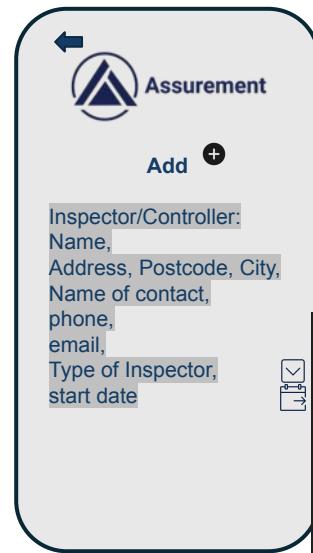

This screenshot shows the 'Add' screen for adding a subcontractor. It includes a back arrow, the Assurement logo, and the word 'Add'. Below this is a section labeled 'Subcontractors:' containing fields for Name, Address, Postcode, City, Name of contact, phone, email, Type of subcontractor, start date, and an 'upload logo' button. There are also three small circular icons with arrows pointing up, down, and right.

This screenshot shows the 'Company Registration' screen. A yellow arrow points from the previous 'Add Subcontractor' screen to this one, specifically highlighting the 'SUBCONTRACTOR TO SUBCONTRACTOR' section. This section contains fields for Name, Address, Postcode, City, Name of contact, phone, email, and a 'Select as Item' dropdown. The entire 'SUBCONTRACTOR TO SUBCONTRACTOR' section is outlined in yellow.

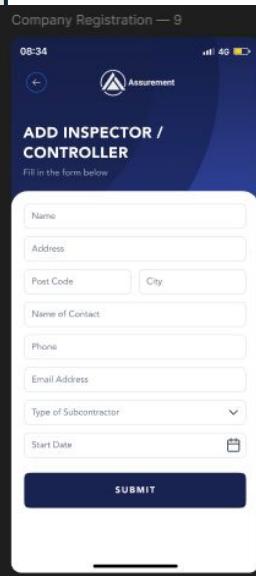

## Section 6 – Company Organisation

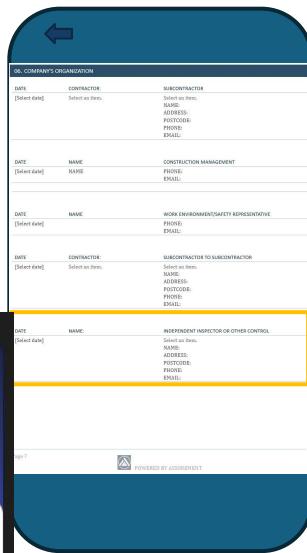

# Assurement

The screen shows a form titled 'Add' with a back arrow at the top left. It contains fields for 'Inspector/Controller:' (Name, Address, Postcode, City, Name of contact, phone, email), 'Type of Inspector', and 'start date' (with a date picker icon).

The screen shows a form titled 'ADD INSPECTOR / CONTROLLER' with a back arrow at the top left. It contains fields for 'Name', 'Address', 'Post Code' (with a dropdown for 'City'), 'Name of Contact', 'Phone', 'Email Address', 'Type of Subcontractor' (dropdown), and 'Start Date' (date picker). A 'SUBMIT' button is at the bottom.

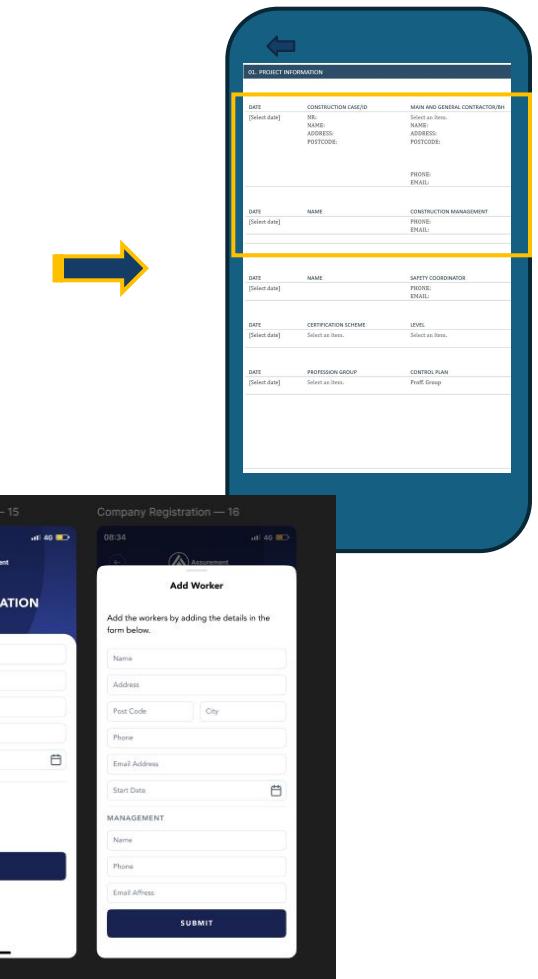

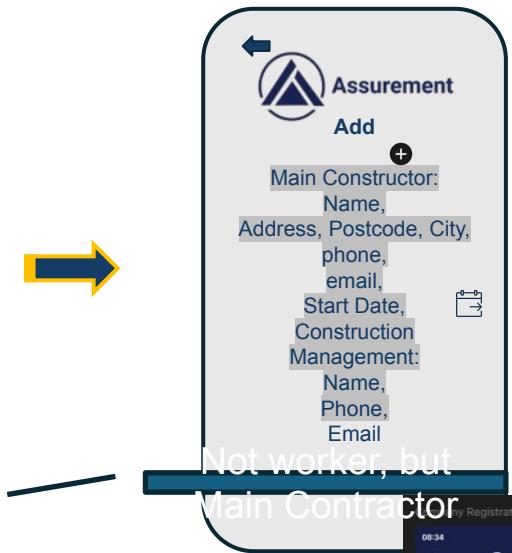

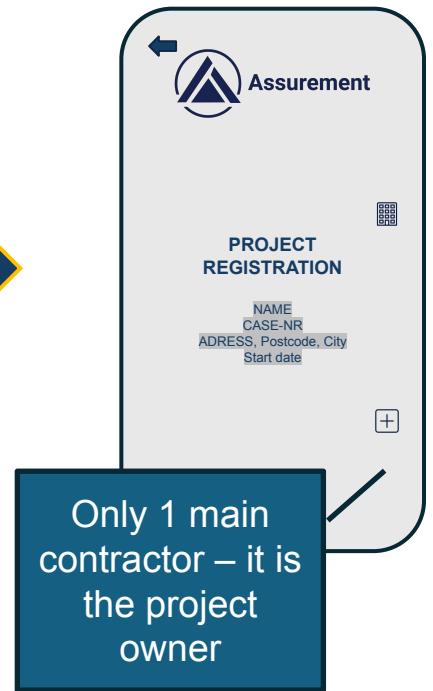

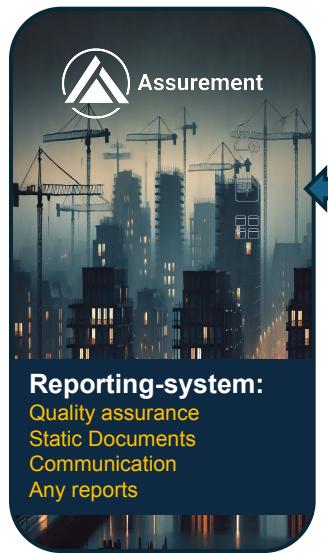

The screen shows a form titled 'Company Registration — 9' with a back arrow at the top left. It contains sections for 'CONSTRUCTION MANAGEMENT' (with fields for 'NAME', 'PHONE', 'EMAIL'), 'WORK ENVIRONMENTS/SAFETY REPRESENTATIVE' (with fields for 'NAME', 'PHONE', 'EMAIL'), 'SUBCONTRACTOR TO SUBCONTRACTOR' (with fields for 'NAME', 'PHONE', 'EMAIL'), and 'INDEPENDENT INSPECTOR OR OTHER CONTROL' (with fields for 'NAME', 'PHONE', 'EMAIL'). A yellow arrow points from the 'INDEPENDENT INSPECTOR OR OTHER CONTROL' section towards the 'ADD INSPECTOR / CONTROLLER' form on the adjacent screen.

## Section 2 – ASSOCIATED ADVISORS AND INSPECTOR Assurance

List of advisor types:

- Architect
- Engineer
- Fire
- Acoustics
- Technical subject

A section per added Advisor. In the example three advisors had been added

## Section 3 - FOUNDATION/DOCUMENTS RECEIVED BEFORE START

# Assurement

**Assurement gives a suggested wording.**  
The Customers can then follow this and use the standard as is-  
Or add it to his own library and update the wording, that then goes into this section for every report his creates.

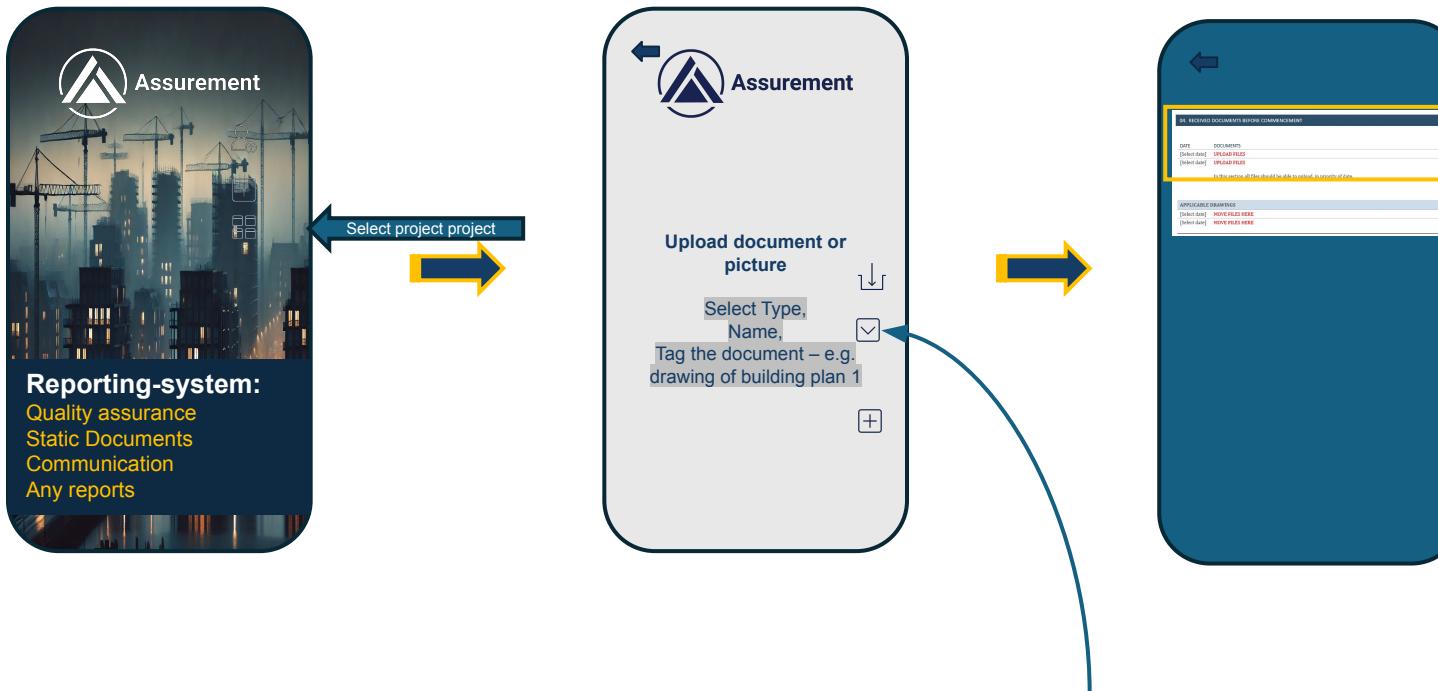

Use  
DropDownMenu SubjectMatters

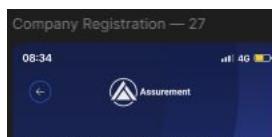

## Section 4 - RECEIVED DOCUMENTS BEFORE COMMENCEMENT

A section per added file. In the example 2 pdf's and 2 drawings had been added

### List of advisor types:

- Main contractors control plan
- Drawings

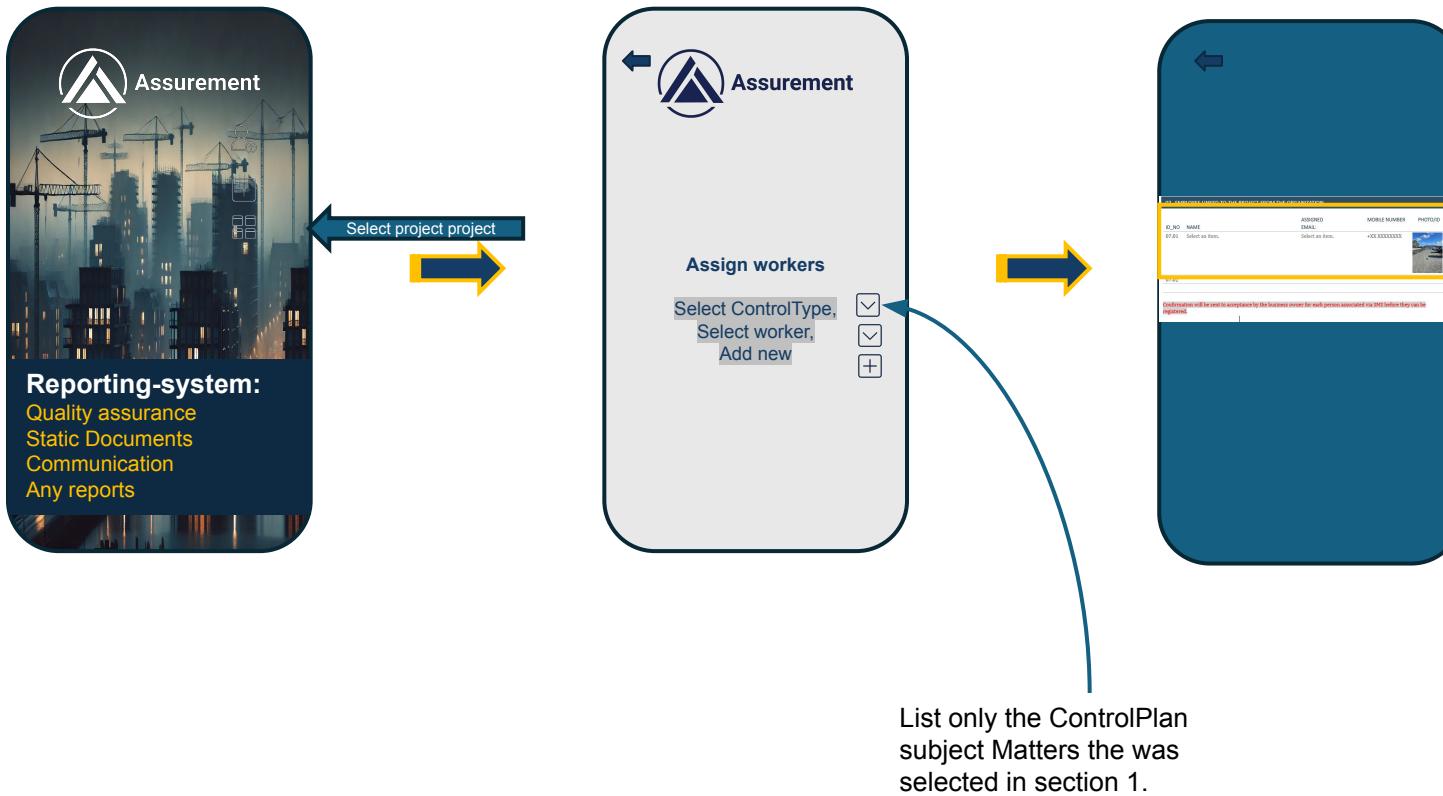

## Section 5 - THE CHECKLIST admin and Projectmanager

List all check list points

## Section 7 -EMPLOYEE LINKED TO THE PROJECT FROM THE ORGANIZATION

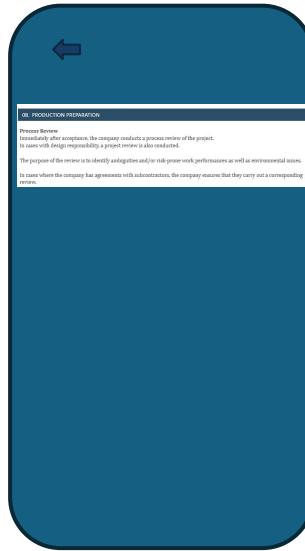

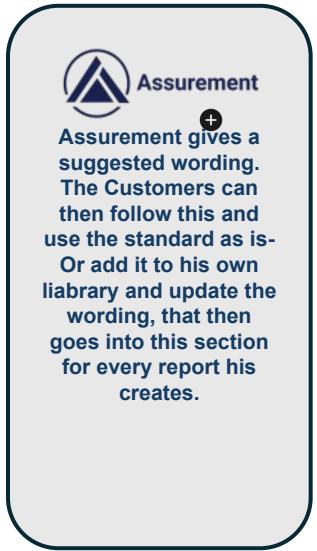

A section per added worker.  
Data is collected from Section 6. In the example 1 worker had been added

ID_NO	ACTIVITY	CONTROL OF:	CONTROL TYPE:																					
[Select date]	Select an item.	Select an item.	Select an item.																					
13.01	TEXT:																							
 <b>GOTTFRED PETERSEN A/S</b> Hydrofuge og hydrofugeplaster til vandbehandling																								
<b>HYDROTITE®</b>																								
<b>EKSPANDERENDE FUGEBÅND Hydrostic®</b> Et ekstrudert, følgende form af neoprene og et hydrofil (vanddugende) materiale, der udvider sig når det kommer i kontakt med vand. Udstikket brevidet, der danner et vandtæt bånd, der er beregnet for vandtætning såvel i konstruktionsfuger i pladstøbet beton som i fuger mellem prefabricerede elementer. Hydrostic® fugebånd tørner mod gennemtrængning af fugt, uanset om påvirkningen kommer fra den udvendige eller indvendige side af konstruktionen.			 Bis på konting med Hydrostic® mellem det prefabricerede tankelement og vandtætte beton.																					
<b>BESKRIVELSE</b> Et almindigt fugebånd. Hydrostic® fugebånd er en fugebånd, der ekspanderer når det påvirkes af vand. Hydrostic® anvendes i alle former for fuger, hvor der er behov for vandtætning såvel i konstruktionsfuger i pladstøbet beton som i fuger mellem prefabricerede elementer. Hydrostic® fugebånd tørner mod gennemtrængning af fugt, uanset om påvirkningen kommer fra den udvendige eller indvendige side af konstruktionen.			 Bis på konting med Hydrostic® mellem det prefabricerede tankelement og vandtætte beton.																					
<b>MONTERING</b> Hydrostic fugebåndet med hydro klar, der er en fugemasse med en høj klæbereffekt, og som hurtigt på tørre og mættede overflader uden brug af primér. Hydrostic® kan evt. yderligere fastgøres ved hjælp af stålramme eller aluminiumslaglægter. Ekstra sikkert opnås ved at anvende Leakmaster UV-Z som kleber.			 Bis på konting på Hydrostic® mellem det pladstøbede bundstøde og vug.																					
<b>REAKTIONSTID</b> I thioplastisk Expansion på 2-3 dage. Indbygger ikke ekspansion over længere tid, afhængig af den vandmengde og det præs. Profilen understøttes for.			 Bis på konting på Hydrostic® mellem det pladstøbede bundstøde og vug.																					
<b>EKSPANSION</b> Hydrostic® er et ekstrudert profil, fremstillet af neoprene og hydrofil, gummieret og følgende med vand. Reaktionen mellem det hydrofuge gummi og vand medfører en udvidelse, der teoretisk kan blive mange gange den oprindelige volumen. I praksis er udvidelsen afhængig af, om det er rent drikkevand eller fersk, salbad og lign. vandige oplosninger.			 Bis på konting på Hydrostic® mellem det pladstøbede bundstøde og vug.																					
Ekspansionskurven i rent vand og halvvand			 <p>The graph illustrates the expansion behavior of Hydrostic®. The Y-axis represents 'Volumenforskel ved udvidelse' (Expansion difference) from 0 to 15, and the X-axis represents 'Hedstykning (tid dage)' (Expansion time in days) from 0 to 90. Two curves are shown: 'Rent vand' (Clean water), which rises sharply from day 0 to a plateau around 12-13 at day 10; and 'Halvvand' (Half water), which rises more gradually, reaching a plateau around 8-9 at day 40.</p> <table border="1"> <caption>Data points estimated from the graph</caption> <thead> <tr> <th>Hedstykning (tid dage)</th> <th>Volumenforskel ved udvidelse (Rent vand)</th> <th>Volumenforskel ved udvidelse (Halvvand)</th> </tr> </thead> <tbody> <tr><td>0</td><td>0</td><td>0</td></tr> <tr><td>5</td><td>10</td><td>5</td></tr> <tr><td>10</td><td>12-13</td><td>8-9</td></tr> <tr><td>20</td><td>12-13</td><td>10</td></tr> <tr><td>40</td><td>12-13</td><td>8-9</td></tr> <tr><td>90</td><td>12-13</td><td>8-9</td></tr> </tbody> </table>	Hedstykning (tid dage)	Volumenforskel ved udvidelse (Rent vand)	Volumenforskel ved udvidelse (Halvvand)	0	0	0	5	10	5	10	12-13	8-9	20	12-13	10	40	12-13	8-9	90	12-13	8-9
